DID YOU KNOW...
About **15 percent** of an average home energy bill goes to heating water? To save hot water, take *five minute showers* instead of baths. Do only *full loads* when using the clothes washer or dishwasher. Use *cold water* for laundry and save up to \$65 a year—detergents formulated for cold water get clothes just as clean.

The first Earth Day...

On **April 22, 1970**, 20 million people across America celebrated the first Earth Day. It was a time when cities were buried under their own smog and polluted rivers caught fire. Now Earth Day is celebrated annually around the globe. Through the combined efforts of the U.S. government and grassroots organizations, what started as a day of national environmental recognition has evolved into a world-wide campaign to protect our global environment.
